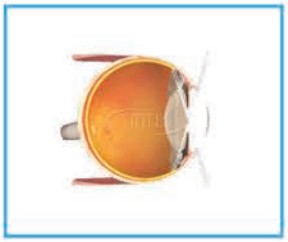
The Finest Ophthalmic Imaging



Classic BIO Lenses

Aspheric ophthalmic lenses were developed by Dr. David Volk in 1956, correcting aberrations induced by the then-common spherical lenses.

Several developments occurred with the aspheric lens designs through the years, delivering far superior imaging for BIO examinations. In 1982, all Volk lenses for indirect ophthalmoscopy were redesigned with both surfaces aspheric, providing a substantial improvement in image quality.

The 20D and other Volk BIO lenses have been known as the industry standard for decades, and are still widely used in every corner of the world today.

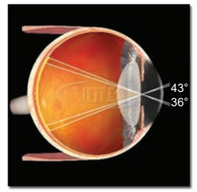
Classic Series	Field of View	Image Mag.	Laser Spot Mag.	Working Distance	Primary Application
Macula Plus® 5.5	36° / 43°	5.50x	0.18x	80 mm	Ultra-high resolution viewing of posterior pole
14D	36° / 47°	4.30x	0.23x	75 mm	High magnification viewing of posterior pole
15D	36° / 47°	4.11x	0.24x	72 mm	
20D	46° / 60°	3.13x	0.32x	50 mm	General diagnosis and treatment
Pan Retinal® 2.2	56° / 73°	2.68x	0.37x	40 mm	
25D	52° / 68°	2.54x	0.39x	38 mm	Mid-peripheral diagnosis and treatment
28D	53° / 69°	2.27x	0.44x	33 mm	Small pupil diagnosis and treatment
30D Small	46° / 60°	2.10x	0.48x	30 mm	Small profile lens for ease of use within the orbit
30D	58° / 75°	2.15x	0.47x	30 mm	Small pupil diagnosis and treatment
40D	69° / 90°	1.67x	0.60x	20 mm	Retinal examination and diagnosis at the far periphery
Digital Series	**Field of View**	**Image Mag.**	**Laser Spot Mag.**	**Working Distance**	**Primary Application**
Digital Clear Field	55° / 72°	2.79x	0.36x	37 mm	For mid and far-peripheral retinal examination
Digital Clear Mag	38° / 49°	3.89x	0.26x	60 mm	For detailed optic disc and posterior pole examination

Macula Plus® 5.5

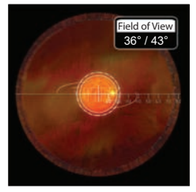
Primary Application – Ultra-High Magnification View of the Central Retina

- Excellent stereo imaging for diagnosis of macular abnormalities
- High magnification facilitates examination of geriatric patients
- Lens adapter provides stability with extended working distance

Product code:
VMP5.5



2D View



Field of View

14D

Primary Application – High Magnification Viewing of the Posterior Pole

- High magnification provides excellent imaging of the macula and optic disc
- Detailed view of the optic disc facilitates glaucoma screening examination

Digital Series BIO Lenses

The digital series BIO lenses are a result of Volk's spirit of innovation and undying commitment to optical excellence. The double aspheric design was further improved using advanced modeling techniques coupled with low-dispersion glass thereby reducing chromatic aberrations to provide superior high definition images. Advanced A/R coating reduces reflections and glare up to 50% more than traditional A/R coatings.

Classic Series	Field of View	Image Mag.	Laser Spot Mag.	Working Distance	Primary Application
Macula Plus® 5.5	36° / 43°	5.50x	0.18x	80 mm	Ultra-high resolution viewing of posterior pole

Classic Series Slit Lamp Lenses

From starting the revolution of slit lamp fundus examination to establishing the standard of retinal examination, Volk has been committed to providing you with the right tools to diagnose and treat ocular pathologies.

A series of indirect ophthalmoscopy lenses were developed, resulting in the choice of the 90 Diopter lens as the most practical for indirect ophthalmoscopy with the slit lamp. The Volk 60D and 90D lenses were commercialized providing a variety of characteristics: magnification, field of view, and undilated pupil examination.

Classic Series	Field of View	Image Mag.	Laser Spot Mag.	Working Distance	Primary Application
60D	68° / 81°	1.15x	0.87x	13 mm	High magnification view of the posterior pole
78D	81° / 97°	0.93x	1.08x	8 mm	General diagnosis and treatment
90D	74° / 89°	0.76x	1.32x	7 mm	General diagnosis/small pupil examinations
Super Series	**Field of View**	**Image Mag.**	**Laser Spot Mag.**	**Working Distance**	**Primary Application**
Super 66®	80° / 96°	1.0x	1.0x	11 mm	High magnification view of the central retina
SuperField®	95° / 116°	0.76x	1.30x	7 mm	General retinal scanning situations
Super VitreoFundus®	103° / 124°	0.57x	1.75x	4-5 mm	Wide field retinal scanning and small pupil exams (3-4 mm)
SuperPupil® XL	103° / 124°	0.45x	2.20x	4 mm	Examination through small pupils (2-3 mm)
Digital Series	**Field of View**	**Image Mag.**	**Laser Spot Mag.**	**Working Distance**	**Primary Application**
Digital Wide Field®	103° / 124°	0.72x	1.39x	4-5 mm	High resolution, wide field retinal scanning and reduced glare and reflections
Digital High Mag®	57° / 70°	1.30x	0.77x	13 mm	Highest resolution and magnification for imaging of the posterior pole with reduced glare and reflections
Digital 1.0x Imaging Lens	60° / 72°	1.0x	1.0x	12 mm	High resolution 1.0x imaging with reduced glare, ideal for optic disc measurements and slit lamp photography

Super Series Slit Lamp Lenses

Our drive to improve indirect imaging at the slit lamp led us to develop our 2nd Generation slit lamp lenses: The Super Series. Working with high grade glass types, we reviewed and improved the double aspheric designs which were so successful in the classic 90D, 78D and 60D lenses, to bring you the Super Series. A group of four lenses was developed to deliver wide field, high magnification, and specialty features such as unsurpassed small pupil capabilities – the full diagnostic spectrum!

Classic Series	Field of View	Image Mag.	Laser Spot Mag.	Working Distance	Primary Application
60D	68° / 81°	1.15x	0.87x	13 mm	High magnification view of the posterior pole
78D	81° / 97°	0.93x	1.08x	8 mm	General diagnosis and treatment
90D	74° / 89°	0.76x	1.32x	7 mm	General diagnosis/small pupil examinations
Super Series	**Field of View**	**Image Mag.**	**Laser Spot Mag.**	**Working Distance**	**Primary Application**
Super 66®	80° / 96°	1.0x	1.0x	11 mm	High magnification view of the central retina

Digital Series Slit Lamp Lenses

Volk has taken double aspheric lenses to the next level with our 3rd Generation slit lamp lenses: The Digital Series. Similar to the Digital BIO lenses, we combined advanced engineering techniques with higher grades of glass to produce detailed views of the retina that were previously unattainable at the slit lamp. Our Digital Series slit lamp lenses are equipped with an advanced A/R coating that reduces reflections and glare by up to 50%, as compared to a traditional coating.

Whether you're looking for a wider field of view or higher magnification, Volk's Digital Series slit lamp lenses have you covered. The Digital Wide Field®, Digital High Mag®, and Digital 1.0x Imaging Lens offer the highest image resolution available.

Classic Series	Field of View	Image Mag.	Laser Spot Mag.	Working Distance	Primary Application

Indirect Contact Laser Lenses

Volk's range of indirect contact laser lenses are designed to provide retinal images and are ergonomically designed keeping both practitioner and patient comfort in mind.

Our exclusive Advanced No Fluid (ANF+) contact design provides optimal stability during examination without the need for contact fluid. However, it may be beneficial to utilize a lubricating fluid for patient comfort. This contact design should not be used for laser procedures.

We recommend using flanged versions when using a laser. Flanged versions provide optimal stability on the cornea. A coupling fluid should be used with our flanged laser lenses.

No flange (NF) versions of our lenses have a smaller corneal contact area than our flanged versions. A coupling fluid should be used with our no flange (NF) lenses.

Lens	Field of View	Image Mag.	Laser Spot Mag.	Primary Application
Super Quad® 160	160° / 165°	0.50x	2.0x	Wide field of view for pan retinal examination and laser treatments

Direct Contact Laser Lenses

Volk's fundus laser lenses provide high resolution views of the fundus for treatment of the posterior pole.

Flanged versions provide optimal stability on the cornea.

Our exclusive advanced no fluid (ANF+) flange is designed to provide optimal stability during examination without the need for contact fluid. However, it may be beneficial to utilize a lubricating fluid for patient comfort. A standard fluid, flanged contact option is recommended for laser procedures. (VCDANF+ is flanged, but still not sufficient for laser use.)

Gonio Lenses

Volk's Gonio Lenses are the industry standard for performing static, dynamic, and indentation gonioscopy. Our no flange G-Series lenses (G-1, G-2, G-3, G-4, and G-6) have a small contact area which maximizes patient comfort and minimizes corneal wrinkling during dynamic exams.

The standard flange contact on our G-Series and the no flange style of our 3-Mirror lens provides optimal stability and control on the cornea during laser procedures. A coupling fluid must be used with our 3-Mirror, no flange gonio lens.

Every glaucoma specialist should have at least one of Volk's gonio lenses in their portfolio.

Lens	Mirror Angles	Image Magnification	Laser Spot Size	Contact Diameter
G-1 Gonio	62°	1.50x	0.67x	15 mm
G-1 Gonio, No Flange	62°	1.50x	0.67x	8.4 mm
G-2 Gonio	60° / 64°	1.50x	0.67x	15 mm
G-2 Gonio, No Flange	60° / 64°	1.50x	0.67x	8.4 mm
3 Mirror, No Flange	60° / 66° / 76°	1.06x	0.94x	15.3 mm
3 Mirror, ANF+	60° / 66° / 76°	1.06x	0.94x	18 mm
G-3 Gonio	60° / 66° / 76°	1.06x	0.94x	15 mm
G-3 Gonio, No Flange	60° / 66° / 76°	1.03x	0.97x	11.4 mm
G-3 Gonio Mini, No Flange	60° / 66° / 76°	1.0x	1.0x	9.6 mm
G-4 Gonio	4x64°	1.0x	1.0x	15 mm
G-4 Gonio, No Flange	4x64°	1.0x	1.0x	8.4 mm
G-4 High Mag Gonio	4x64°	1.50x	0.67x	15 mm
G-4 High Mag Gonio, No Flange	4x64°	1.50x	0.67x	8.4 mm
Mini 4-Mirror	4x62°	1.0x	1.0x	15 mm
G-6 Gonio, No Flange	6x63°	1.0x	1.0x	8.4 mm

Note :

A coupling fluid should always be used with the flanged version of our G-Series gonio lenses.

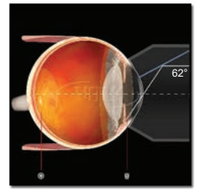
No flange (NF) versions have a small corneal contact area and are excellent for diagnostic work. It may not be necessary to use a contact fluid with these versions (G-Series gonio lenses only).
A coupling fluid should be used with our 3-Mirror, no flange gonio lens.

G-1 Gonio

1-Mirror, All-Glass Design

- High magnification (1.50x) enables detailed viewing of the trabecular meshwork
- All-glass design provides superior clarity and durability
- Available in two formats: flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code:
Flange: VG1 (as shown)
No Flange: VG1NF



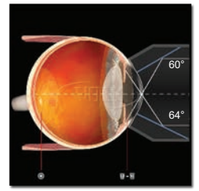
2D View

G-2 Gonio

2-Mirror, All-Glass Design

- High magnification (1.50x) combined with dual mirror angles (60°/64°) allows for both a detailed and a broad view of the anterior chamber
- All-glass design provides superior clarity and durability
- Available in two formats: flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code:
Flange: VG2 (as shown)
No Flange: VG2NF



2D View

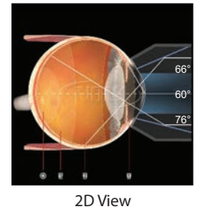
Available in mini version for pediatric and patients with small orbits

G-3 Gonio

3-Mirror, All-Glass Design

- 60˚ mirror provides a view of the iridocorneal angle
- 66˚ mirror provides a retinal image from the equator to the ora serrata
- 76˚ mirror provides a view of the mid-peripheral/peripheral retina
- Available in two formats: flanged (recommended for laser trabeculoplasty) and no flanged (recommended for routine gonioscopy)

Product code:
Flange: VG3
No Flange: VG3NF (as shown)
Gonio Mini, No Flange: VG3MININF (as shown)



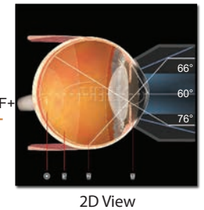
2D View

3-Mirror

Primary Application – 3-Mirror, Acrylic Design

- 3-mirror design provides the same views as our G-3 Gonio lenses but in a light weight acrylic design
- Uncoated lenses are ideal for diagnostic exams while coated lenses are perfect for laser treatments
- Advanced no fluid (ANF+) flange only requires a coupling fluid during laser procedures

Product code:
No Flange: V3MIR (as shown)
ANF+ Flange: V3MIRANF+
No Flange, No Coating (Diagnostic): VU3MIR
ANF+ Flange, No Coating (Diagnostic): VU3MIRANF+



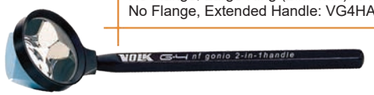
2D View

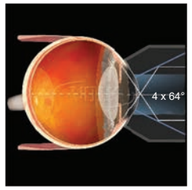
G-4 Gonio

4-Mirror, All-Glass Design

- 4-mirror design allows for comprehensive examination and treatment of the trabecular meshwork with minimal lens rotation
- Available with a large ring (28.5 mm), a small ring (25.5 mm), or a 2-position handle (right/left handed)
- No flange version is ideal for dynamic and indentation gonioscopy while flanged version provides stability for laser trabeculoplasty

Product code:
With Flange: VG4 (as shown)
No Flange, Small Ring (25.5 mm): VG4SNF
No Flange, Large Ring (28.5 mm): VG4LNF
No Flange, Extended Handle: VG4HAN2





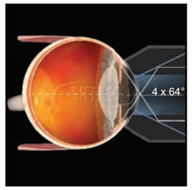
2D View

G-4 High Mag Gonio

4-Mirror, All-Glass Design

- 50% more image magnification than our classic G-4 Gonio enables more detailed viewing of the trabecular meshwork
- Available with a large ring (28.5 mm), a small ring (25.5 mm), or a 2-position handle (right/left handed)
- No flange version is ideal for dynamic and indentation gonioscopy while flanged version provides stability for laser trabeculoplasty

Product code:
With Flange: VG4HM (as shown)
No Flange, Small Ring (25.5 mm): VG4HMSNF
No Flange, Large Ring (28.5 mm):VG4HMLNF
No Flange, Extended Handle: VG4HMHAN2



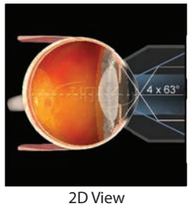
2D View

Mini 4-Mirror

4-Mirror, Acrylic Design

- Smaller, lighter-weight design facilitates easy manipulations within the orbit
- Advanced no fluid (ANF+) flange does not require coupling fluid during routine gonioscopy

Product code:
V4MANF+



2D View

G-6 Gonio

6-Mirror, All-Glass Design

- 6 closely-aligned mirrors create a panoramic view of the anterior chamber and minimize the need for dynamic gonioscopy
- Available with a large ring (28.5 mm) or a 2-position handle (right/left handle)

Product code:
No Flange, Large Ring (28.5 mm):VG6LNF
No Flange, Extended Handle: VG6HAN2

High Resolution (HR) Direct Image Surgical Vitrectomy Lenses

Volk's high resolution direct image lenses utilize a high index glass to deliver superior image quality. This robust glass type is highly resistant to the rigors of continued steam sterilization and will not deteriorate or discolor.

Volk's No Stabilizing Ring (NSR) range of lenses allow suitable stability without the need for suturing or stabilizing rings. Two of the lenses in the group are also available in a no suture ring design. The profiles of these two lenses allows them to stabilize suitably without the need for an additional stabilizing ring.

Lens	Field of View	Image Mag.

VOLK®1 SINGLE-USE

Single-Use Surgical BIO Lenses

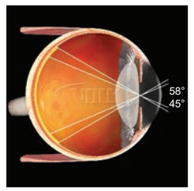
Volk®1 single-use surgical BIO lenses combine high-quality optics that Volk is known for and the convenience of pre-sterilization into a ready-to-use design. Volk's single-use surgical BIO lenses enable convenient pre- and post-operative examination and laser treatment.

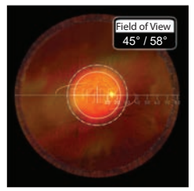
Single-use lenses are pre-sterilized and individually-packaged in a Tyvek® pouch. Single-use lenses are sold in boxes of 10.

Volk®1 Single-Use 20D

Primary Application – Industry Standard Diagnostic Lens in a Single-Use Format
- Perfectly balanced magnification and field of view make this lens ideal for general diagnostic examination

Product code:
V20LCD10

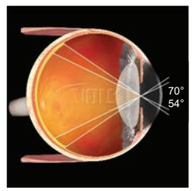


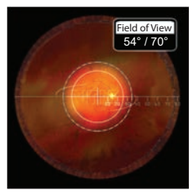


Volk®1 Single-Use 28D

Primary Application – Fundus Scanning Lens in a Single-Use Format
- Excellent for examination and treatment through a small pupil

Product code:
V28LCD10





Single-Use Surgical Direct Image Vitrectomy Lenses

Available in six popular styles, these lenses deliver high resolution direct-image retinal views for all vitrectomy procedures. The SSV® (self stabilizing) contact design eliminates the need for sutures or rings, designed in collaboration with K.V. Chalam, MD. They are packaged individually in an easy to open peel pack and are boxed in quantities of 10 lenses.

Research Lenses

Lens	Part Number	Image Mag.	Contact Diameter	Lens Height	Handle Length
2 mm Fundus	V2MFUNDUS	1.0x	2 mm	5 mm	76 mm
2 mm Gonio	V2MGONIO	1.0x	2 mm	11 mm	84 mm

Fundus Lens

Provides high resolution views of the posterior pole. Its upper surface has an A/R coating to minimize reflections and glare and maximize laser throughput. The contact surface is conically shaped to facilitate placement and does not require viscous coupling fluid. Its handle is fixed at 45°.

Glass Gonio Lens

Provides high resolution views of the anterior chamber angle structures with four equally angled mirrors. Views of the optic nerve and posterior retina can be obtained through the center of the lens. The small contact surface does not require viscous coupling fluid. Its handle may be fixed in two positions: straight or at a 45° angle.

Volk Accessories

Volk Lens Pen®

Primary Application – Dry Cleaning of Coated Ophthalmic Lens Surfaces

- Carbon based cleaning pad wipes away smudges and reduces static build up
- Cost effective device good for 400–500 uses
- Conveniently stows away like a pen with a pocket clip

Product code:
VLENSPEN

Not for use on surfaces that contact the eye.

Precision Optical Lens Cleaner

Primary Application – Cleaning of Ophthalmic Lenses

- Absorbent, moistened lint-free towelette cleans lenses instantly, free from smudges, haze and water spots
- Ideal for use on Volk lenses, microscope eyepieces, cameras and other precision optical surfaces
- Packaged in boxes of 24. Bulk case purchase contains 108 boxes

Product code:
Box: VPOLC1
Case: VPOLCCASE

Not for use on surfaces that contact the eye.

Steady Mount

Primary Application – Precisely Holds and Positions Volk Lenses at the Slit Lamp

- Holds lenses steady at the slit lamp to facilitate photography and routine examinations
- Lens can be positioned, tilted and angled in all planes providing versatility
- Adapts to all slit lamps and holds all Volk lenses ensuring ease of use

Product code:
VSM

Suture Ring

Primary Application – Provides a Stable Lens Platform During Vitreoretinal Surgery

- Premium surgical implant grade titanium for optimal durability and ease of sterilization
- Larger radius provides enhanced functionality and safety during use
- Compatible with all Volk direct and indirect contact vitrectomy lenses (except SSV® styles)

Product code:
VSRS2

Infusion Handle

Primary Application – Infusion of Saline Solution Beneath the Lens During Vitreoretinal Surgery

- Flushes blood and debris providing a clear view during surgery
- Autoclave sterilizable for reduced processing time
- Ideal for diabetic surgery

Product code:
VINFHAN

VitreoLens Handle

Primary Application – Holding and Stabilization of Lenses During Vitreoretinal Surgery

- Holds vitrectomy lenses stably to assist vitreoretinal surgery
- Malleability allows user to bend the handle to suit their preference
- Autoclave sterilizable for reduced processing time

Product code:
Mini Quad and Central Retinal: VVITHAN-LG
HRX, Mini Quad XL and Super Macula: VVITHAN-MQXL

Sterilization Tray

Primary Application – Sterilization of Ophthalmic Lenses

- Autoclave safe and approved for use with ETO
- Small tray (2.7" x 1.5" x 1.25") houses Volk surgical and smaller indirect and slit lamp lenses
- Large tray (6" x 2.5" x 1.25") houses the largest Volk lenses and accessories including vitrectomy handles

Product code:
Small Tray: VSCA
Large Tray: VSCB

Cases and Personalization

Volk's new single-lens case features a sleek and modern functional design. We've incorporated a robust hinge designed to withstand over 50,000 openings and a magnetic closure that keeps your lens securely stored within the case.

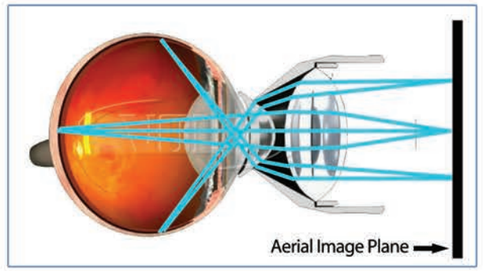
Engraving

Add a personal touch to your lenses and single-lens cases by engraving custom text on them to create a personal possession that will last a lifetime.

Want to keep your lenses together?

Keep all our lenses in one convenient location with our multi-lens cases. Our multi-lens cases are available in two sizes: 3"x4" for up to 3 lenses or 4"x6" for up to 6 lenses. Almost any combination can be accomodated. Even if a standard case cannot meet your need, we can provide a customized solution for you.

Design Options



Patented Double Aspheric Lens Design

All Volk lenses are optically engineered using proprietary computer ray tracing and design criteria. The laser contact lens ray tracing at left shows light rays originating at the illuminated fundus and proceeding through the pupil and cornea to the first contact element. The diverging light bundles are converged and redirected towards the double aspheric imaging lens which further refracts and focuses the rays as a conjugate fundus image in the aerial image plane. From the beginning on the drawing board to final production and sale, each Volk lens is designed and produced to the quality standards that your practice demands.

Contact Options (Gonio Lenses)

Flanged versions of the G-Series provide optimal stability on the cornea and are suggested for laser treatment use.

No flange (NF) G-Series lenses have a small corneal contact area and are excellent for diagnostic work. It may not be necessary to use a contact fluid with these versions (gonio lenses only).

Our exclusive **ANF+** flanged 3-Mirror version is designed for diagnostic viewing without the need for a contact fluid. It is beneficial to utilize a lubricating fluid for patient comfort.
The 3-Mirror No flange style requires a coupling fluid during diagnostic and Argon laser use.

The 3-Mirror No flange style requires a coupling fluid.

Contact Options (Contact Laser Lenses)

Flanged versions provide optimal stability on the cornea.

No flange (NF) versions have a smaller corneal contact area than flanged versions. It is still necessary to use a contact fluid with these versions.

Our exclusive **ANF+** flanged version is designed to provide optimal stability without the need for a contact fluid. During diagnosis, it may be beneficial to utilize a lubricating fluid for patient comfort.

Volk Laser/Anti-Reflective Coatings and Filters

Most Volk lenses come standard with high efficiency laser/anti-reflective (A/R) coatings to optimize laser throughput and to assist in diagnosis by reducing glare in the visible spectrum.

Please contact Volk for additional information on laser coatings.
